Who we are

We are a Technology company dedicated to the manufacturing of products of Telemetry, Connectivity and Acquisition, for monitoring dispersed and remote assets.

- The Company was founded in 1998 (Argentina)
- **ISO9001:2008** Certification (Quality)
- **ATEX** Products Certification, pending (Explosive Atmospheres)
- **MODBUS** organization members
- Approvals **CNC** (network registrations)
- Exportation of products to more than 60 countries
- Incorporated into the Software Promotion Law
- Proprietary Know-How

Chambers which participates Exemys

USA Chamber of Commerce

Chambers of Exportes of the city of Buenos Aires

Chamber of Electronic and Electrical Industries

Argentine Wind Cluster

Products

Telemetry Systems

- Celullar
- Satellital
- Ethernet
- Industrial ZigBee
- Telemetry Web Server

Acquisition Devices

- TCP Analog Acquisition
- Modbus Analog Acquisition
- Modbus I/O Expansion Modules

Connectivity Devices

- Serial to Ethernet Converters
- Serial Modbus to TCP Converters
- Modbus Multiplexer

Media Converters

- RS232 to RS485/422
- RS232/485 to fiber optics
- Ethernet to fiber optics

Software

- Telemetry Web Server
- Serial Com Port Redirector

Accessories

- Temperature sensors
- Pannels
- Antennas
- Solar Energy

Clients

Argentina

Petróleo y Gas

- YPF - Pan American Energy - Pluspetrol
- Tecpetrol - Enap Sipetrol - Total Austral
- TGN - TGS - Gasnor - ESSO - Apache
- Medanito - Hoerbiger - Exterran - Cameron
- Duke Energy - Oil Tanking - Weatherford
- Chañares Herrados - Lufkin - Liftoil - Entre Lomas

Energía Eléctrica

- EDESUR – EDENOR – EDET – EJESA - EDENSA
- EMSA - EDESE - EPEC - EDEMSA - EDVSA
- Energía de la Pampa - Distrocuyo

Agua Potable y Saneamiento

- AYSA - Aguas Santafesinas - Aguas Cordobesas
- Aguas Rionegrinas - Aguas Bonaerenses

Estado Nacional

- Dirección Nacional de Vialidad
- Instituto Balseiro
- INVAP
- Comisión Nacional de Energía Atómica
- Servicio Meteorológico Nacional
- Instituto Nacional de Tecnología Agropecuaria
- Instituto Nacional de Tecnología Industrial
- Instituto de Investigaciones Científicas y Técnicas para la Defensa
- Fuerza Aérea Argentina

Otras empresas

- Siderca - Siderar - Loma Negra - Mastellone
- Fibertel – Cablevisión - Biogénesis Bago
- Honeywell – Rockwell Automation
- Siemens – Schneider Electric - Invensys

Latinoamérica

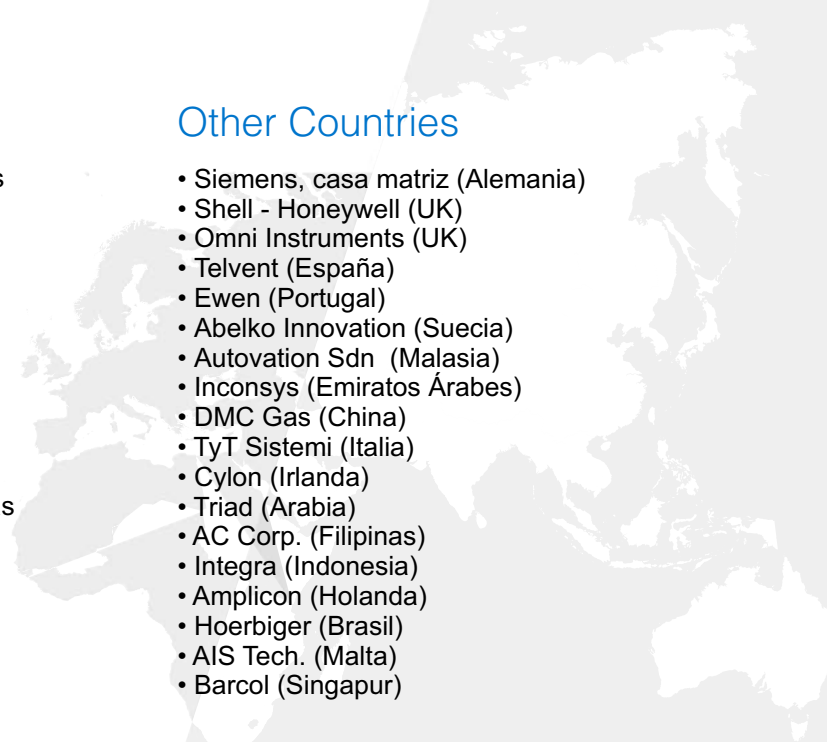

- STE Ingenieria (Bolivia)
- ESENCO (Colombia)
- RS ROTH (Ecuador)
- SEL (Honduras)
- Telemetix (México)
- VIS (Paraguay)
- FIDEMAR (Uruguay)
- VANESOFT (Venezuela)

USA - Canada

- Boeing Company
- US Navy
- Dell Computers
- Exxon Mobil Corp.
- Schlumberger Canadá
- Daimler Chrysler
- Cornerstone Automation
- IC Systems
- Invensys

Other Countries

- Siemens, casa matriz (Alemania)
- Shell - Honeywell (UK)
- Omni Instruments (UK)
- Telvent (España)
- Ewen (Portugal)
- Abelko Innovation (Suecia)
- Autovation Sdn (Malasia)
- Inconsys (Emiratos Árabes)
- DMC Gas (China)
- TyT Sistemi (Italia)
- Cylon (Irlanda)
- Triad (Arabia)
- AC Corp. (Filipinas)
- Integra (Indonesia)
- Amplicon (Holanda)
- Hoerbiger (Brasil)
- AIS Tech. (Malta)
- Barcol (Singapur)

Applications

Oil and Gas

The gas compressors in the wellhead are installed and dispersed in remote sites. The telesupervision of the functioning compressors permits improved performance of the machine, increasing its productivity.

Industrial

Connectivity of the control panels of wind turbines through fiber optic rings.

Electric Power

Remote monitoring and control of large size generators.

Water and Sanitation

Wireless acquisition of basic variables of measurement from the injection of current rectifiers for the cathodic protection of pipelines.
