

## Vending machines:

### Saving time and money in vending machines business.

The highest operative costs in vending machines refilling Service Companies are due to maintenance, logistics and efficient stock administration. The employee who refills the machines has to visit each installed unit in order to collect the money and refill the stock. In other words, he has to check every point of sale, without *a priori* information about remaining stock and its location.

**Using our product KIBe, logistics departments will be able to receive stock information on a cell phone, pager or e-mail client, indicating whether a given machine is running out of products or coins. Even more, it can send a message to the tech support if any failure is detected. By having updated information it is possible to have a reasonable stock, avoiding oversizing.**

### Benefits.

→ **Reduced costs in logistics:**

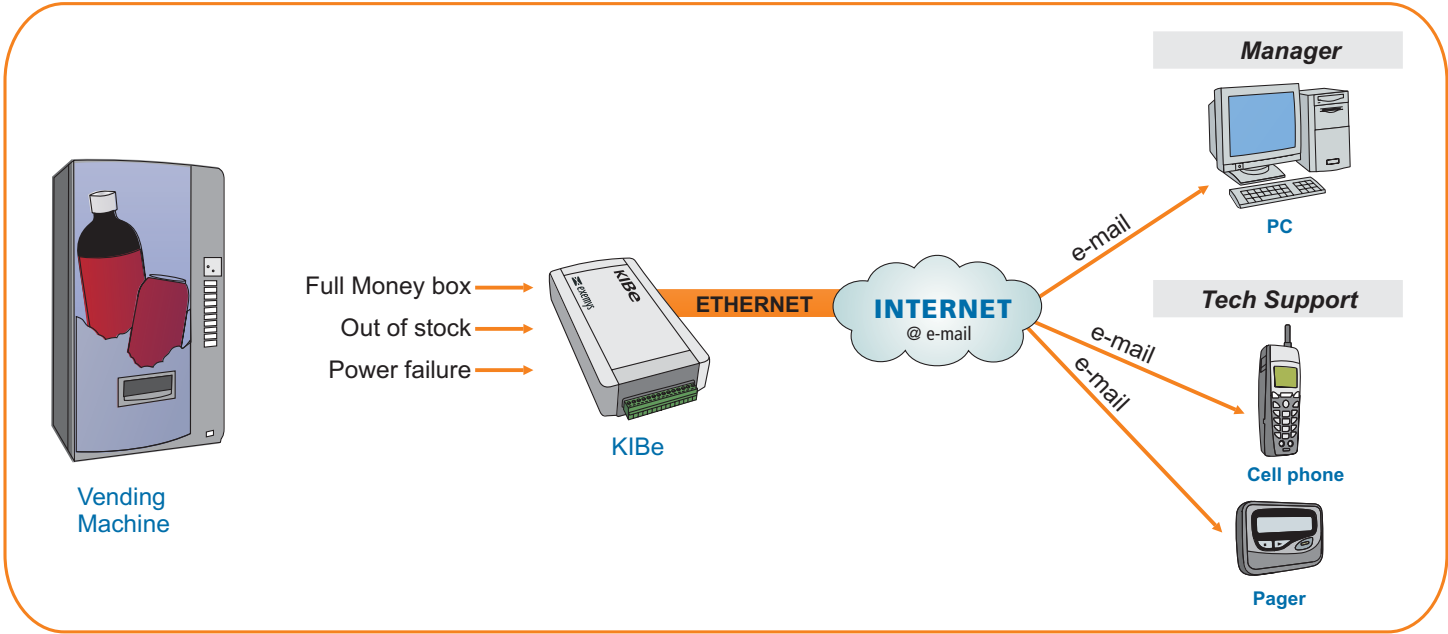

Precise and real time information available lets the employee to visit only those machines that actually needs to be refilled.

→ **Increased productivity of vending machines:**

In average, machines will work for longer times. This will undoubtedly increase customers' satisfaction and quality of service (QoS).

→ **Effective technical support:**

Since the failure is notified in real time, the tech support will be able to solve the problem in a shorter lapse.
